About me

Hello! I am Adrian Hojas More, an enthusiastic and dedicated graphic designer and developer from Havana, Cuba. I hold a degree in Graphic Design from Higher Institute of Design (ISDi), wich is part of the University of Havana. My professional journey has primarily been focused on graphic design; however, my love and curiosity for user interfaces kindled a desire within me to learn HTML and CSS, since then, I have relentlessly worked on expanding my technical skills. Although my area of development is mainly front-end, I have the ability to handle specific back-end tasks.

Coding Stack

Codign

- HTML
- CSS
- Markdown
- JavaScript
- TypeScript
- RegEx

Design Stack

- illustrator
- inDesign
- photoshop
- figma
- spline
- lottie
